

**Email received by 4:00pm on Wednesday October 14<sup>th</sup>, 2020**

**Project = related to the digestive system of humans**

**Write a summary in “simple language” from two scientific paper from Google Scholar on the same topic.**

**Abstract is a brief summary of the following:**

- 1) What was done- meaning what subject/topic was being researched**
- 2) How was this research carried out? What were the methods?**
- 3) What were the results? What statement is the paper making about the topic?**

**Your job is to make both articles easy to understand in terms of what was done, how it was done and what were the results.**

**Make sure you using two articles that are talking about the same thing.**

- 1) This has to be emailed to me**
  - 2) Your summary is in the body of the email**
  - 3) Your Subject Line is your First & Last Name and the topic you chose.**
  - 4) Include the links to your sources**
- 555555)Do not plagerize.....I don't want their words.....I want to see your words so I can**

**determine if you really understand what the paper was about**

**4) You want to end your summary with a statement. This is a strong stance or position based on the information in the articles.**

**This statement is from YOU!!!**

***“I believe that lower back injuries are the most common golf injury experienced by both professional and amateur golfers”***
